# KEEP YOUR NATURAL BEAUTY With Boutique BeYouTeFul Laser Clinic

BY **CANDACE M. FOX** PHOTOS **LISA LANDRIE**

It is a fact we all have to accept: aging is a part of life. Various circumstances, genetics, lifestyle choices and environmental factors all affect how we age, and how our skin and body's look through that process. It is never too soon or too late to start treating and investing in your skin—the largest organ of the body. Using all natural products on the skin that the body can process is important for long term health. For aging or aged skin, cold laser treatments that are non invasive can rejuvenate the skin and repair damage—leaving a youthful complexion.

Boutique BeYouTeFul specializes in offering a wide range of laser treatments. With clients looking years younger and feeling their most confident, owner Terry Wasylyow insists it is an affordable beauty secret that women and men of all ages can take advantage of. With over 30 years in the health and beauty industry, Terry offers her clients proven solutions with the latest technology from around the world.

Options for services include skin rejuvenation treatments which combine

the skin refreshing technique of microdermabrasion with the soothing process of cold lasers to bring your skin to a new level of radiance while renewing skin cells. This treatment stimulates the production of collagen and elastin to naturally lift and firm the skin from the inside out. Cold laser treatments are an advanced technology tool used to rejuvenate the complexion, firm and tone the skin and progressively remove unwanted hair. Cold lasers are safe to use on all skin types and hair colours with no side effects. Developed in Switzerland and

used in Europe for the past 30 years, cold lasers are new to Canada but have been used across the world with proven results.

The Poly Skin and Digi-Light are breakthrough body treatment attachments. The Poly-Skin delivers superior body exfoliation and can be used to maximize lymphatic drainage. The Digi-Light technology gives balanced and regular electrical impulses to the cells, which increases positive cell activity like the production of collagen and elastin—in addition the electrical pathways of the body are repaired and revitalized. This technology combined, using both the Poly-Skin and Digi-Light stimulates the cells through light, polished sapphire crystals and are energized with electrical currents. The combination allows for the cells to be massaged to optimum function—toning the skin, reducing cellulite and promoting full body wellness by balancing the body's chemical and electrical systems within the cells.

Other specialized services and equipment offered at Boutique BeYouTeFul include: osteopathy, salsa & Latin dancing, infrared saunas, sonic vibration therapy, vitamin D therapy bed, red light bed therapy, oxygen bar, intelligent massage chair, Ion cleanses and **"White Hot Smile" teeth whitening**. The health spa also offers traditional beauty and spa services but only uses all natural products with ingredients the body can process naturally—ensuring their customers not only look good, but feel amazing and gain the health benefits of those products.

Terry Wasylow would like to thank her clients for their continued support and for their contribution in making her a SABEX Award nominee for 2013.
